1. The dig +short command returns the short version of the IP address for whatever website you feed the command. For example .com, it returned the IP: 93.184.216.34
2. emmaheck.projectst.si.umich.edu is my server domain name
3. The command to return only the answer section of dig is: dig emmaheck.projectst.si.umich.edu +short
4. Command: dig emmaheck.projectst.si.umich.edu +short > emmaheck-dns-record.txt
